

Financial Astrology Research Software Info:

Thank you for inquiring about the Magi Society's financial astrology software program. Our program is called AstroFibonacci.

Because we know many of you have been hurt by the Bear Markets, the Magi Society is offering a special promotion that saves you \$180. From now until the stock market becomes a bull market again, anyone who purchases AstroFibonacci will receive the Super Fibonacci Upgrade for free - the upgrade normally sells for \$180. In addition, every purchaser of AstroFibonacci will receive a free one-year membership to the Magi Society, including the AstroGeometry Members's Only software PLUS the MAGI ZODIAC upgrade. (This is an additional \$150 value.)

AstroFibonacci is the only available stock and commodity trading software program that can:

1. Greatly help you to better predict stock and commodity market trends, and tops and bottoms, using planetary geometry.
2. Chart Magi Fibonacci Levels
3. Display significant Financial Planetary Alignments made by Sedna, Ceres and Chiron as well as the classic planets, and display both the geocentric and Heliocentric skies on a single chart.
4. Create Magi Zodiac charts. (Magi Zodiac charts were the best astrological indicators of the Dec 2007 high and the March 2009 low in stocks worldwide).

This email contains information about the features of the basic AstroFibonacci program, as well as details about the five upgrades for AstroFibonacci, the costs, and how to order.

The purpose of AstroFibonacci is to help you to improve your ability to:

- A. Time major turns in stock and commodity markets
- B. Time short-term reversals in stock and commodity markets
- C. Assess how long a price trend is likely to continue
- D. Calculate important support and resistance levels
- E. Identify strong underlying price trends

AstroFibonacci is based on the financial astrology principles of Magi Astrology. It is the only program that calculates Magi Fibonacci levels; it even allows you to create and analyze Magi Zodiac charts.

AstroFibonacci is also the only program that incorporates Sedna, Ceres and Chiron into all of its planetary and astrological calculations, including Heliocentric longitudes and latitudes.

Sedna was discovered only a few years ago in 2003. As explained on our website at StockMarketCompass.com, the inclusion of Sedna allows Magi Astrology to make a monumental leap forward in forecasting stock and commodities markets.

Sedna has been a crucial missing link in financial astrology. Ceres and Chiron have also been vital pieces of the astrological puzzle and Magi Astrology successfully incorporated them about a decade ago.

With the addition of Sedna, Ceres and Chiron, and by applying the principles of Magi Astrology, we can now explain most of the stock market plunges for almost the last 100 years, and also most of the roaring bull markets.

We wanted to prove we could make money by trading and using Magi Astrology, so we established our own online trading account. We made a profit of 120% in 2008, the year nearly everyone lost money. We started with \$25,000.00 and ended with over \$57,000.00. We were not just lucky because we did not make our money on a few lucky trades. We made many trades and paid thousands in commissions and still made over 120%.

[Important Disclaimer: Past performance does not guarantee future results. And just because we were successful making money using our software, it does not mean that you or anyone else would also be successful doing so.]

ADD ASTROFIBONACCI DATA TO HELP YOU IMPROVE YOUR TRADING STRATEGIES

The purpose of AstroFibonacci is to provide you with an additional tool to help improve your investments and trading performance. Our goal is to help you to improve your ability to forecast stock and commodity price movements.

We do not advise that you use financial astrology on an exclusive basis. Instead we recommend that you ADD astrology to your other trading tools.

In other words, our advice is to add AstroFibonacci to what you are now using and continue to utilize all the technical tools you now use, such as fibonacci, trendlines, moving averages, RSI, etc.

Hopefully, AstroFibonacci will give you the additional extra FILTER that you can use to improve your trading performance enough to make a difference to you.

We believe AstroFibonacci can help you even if you use any "black box" trading program that gives you automated trading signals. This is because AstroFibonacci can provide the extra filter you need to determine which buy/sell entry signals are the best ones to act on.

THE MAGI SOCIETY'S QUALIFICATIONS AS FINANCIAL ASTROLOGERS

The Magi Society is the world's largest astrological organization with over 5000 members worldwide. The Magi Society is the recognized leader in discovering new astrological knowledge in both the astrology of love and Financial Astrology. Evidence to support this is the fact that used copies of the Magi Society's three books sell for up to ten times their original price (\$300), which make them more valuable than any other used astrology books.

More importantly, the Magi Society is the world's most highly qualified organization to design and program Financial Astrology software. The chief architect of our Financial Astrology software has been a partner and head trader for highly successful hedge funds and Wall Street firms. At the age of 24, he became one of the youngest self-made millionaires through the 1970s and 1980s - he retired early. As far as we know, no other financial astrology software is designed by anyone with the qualifications or track record that even remotely approach those who contributed to the design of Magi Society Financial Astrology software. (Most recently, our chief software designer was successful in 10 of 11 trades.)

ASTROFIBONACCI IS BASED ON MAGI ASTROLOGY, WHICH IS MUCH BETTER THAN NORMAL ASTROLOGY

The Magi Society always knew astrology had value but we were not satisfied with the superstitious nature of normal astrology. So we set out to conduct our own research into the stars to find out what really worked. We concluded the most extensive research ever conducted on astrology and made many discoveries about astrology. We then incorporated the new discoveries into a new form of astrology and we named this new astrology Magi Astrology.

Magi Astrology is the special astrology of the Magi Society. It is based primarily on the ALIGNMENT OF THE PLANETS because we found that is what really worked. Magi Astrology is logically formulated and has none of the superstitions of popular astrology.

OVERVIEW AND HISTORY OF MAGI SOCIETY SOFTWARE PROGRAMS

The Magi Society has been designing and programming computer software for our private use since 1967. But we did not sell any of our programs to the public until 1995 when we published our first book, *Astrology Really Works!*

Since 1995, the Magi Society has developed and sold four generations of astrology software.

Our first software program was MagiSoft and it was a general all-purpose astrology program.

The Magi Society first introduced MagiSoft in 1997 and it was the first software program that we sold to the public. MagiSoft was so advanced that even now a decade after its introduction, MagiSoft still has capabilities in the astrology of love and money that no non-Magi software program has.

MagiSoft's greatest usefulness is derived from its superlative interpretation upgrades. MagiSoft interpretations are simply the best in the world. Our main website at magiastrology.com offers numerous examples of events that occurred after we copyrighted these interpretations that confirm the amazing accuracy of these interpretations.

In June of 2004, we introduced our first Financial Astrology Research software program.

We have already improved our financial astrology research software several times. Our latest version is called AstroFibonacci and it has five upgrades available for purchase.

AstroFibonacci was designed to help all types of investors including day traders, position traders and long-term investors.

Have you ever wondered why a stock is almost never unchanged for two straight days? Stock and commodity prices virtually always change from day to day, and even minute to minute. We think this is due to changes in the alignments of the planets.

AstroFibonacci is designed to help us identify the changes in planetary alignments that make a difference in the financial markets.

We believe that when an intelligent and unemotional trader has mastered our software and the principles of Magi Astrology, the trader can better recognize if it is a bull or bear market, and better forecast likely turning points.

OUR ADVICE: IDENTIFY THE TREND AND NEVER BET AGAINST IT

We believe that the best way to trade is to correctly identify a trend and ride it.

The goal of AstroFibonacci and Magi Astrology is to help you identify a tradable underlying trend.

Many software companies insist that you can make money without having to know if it is a bull or bear market. These companies offer so-called "market neutral" trading software. We think it is pretty tough

to make money using trend neutral strategies. It is much easier to make money by accurately assessing the trend of the market, and riding it.

The markets are not a 50/50 proposition. For example, during a bull market in stocks, the S&P will go up 2 out of 3 days (and the up days are bigger than the down days). This means anyone who trades from the short side will lose money 66% of the days. But if you are long during a bull market, even if you are day trading, you would make money most of the time. A trend is truly your friend.

In a bear market, it is even harder to make money if you are trading from the wrong side of the market.

So the best thing you can do to improve your trading is to be able to identify bull and bear markets.

Here at the Magi Society, we designed our AstroFibonacci Financial Astrology Research Program to help you improve your ability to recognize a bull or bear market in stocks, commodities and currency markets - even for individual stocks. By helping you to identify the trend, AstroFibonacci gives you the ability to take advantage of the trend.

AstroFibonacci uses principles of Magi Astrology to help accomplish this. We understand that some of our users will need help to learn Magi Astrology. For this reason, we offer all purchasers of our AstroFibonacci software the opportunity to participate in regularly held conference calls when we teach Magi Astrology and answer questions.

TIMING IS EVERYTHING

In a bull market, there are often sudden pullbacks that can fake you out. In a bear market, there are bear market rallies that can destroy you.

For these reasons, timing is everything. If you can anticipate when the contra-trend moves will pop up, and better forecast big turns in the markets, obviously you are going to do much better.

The Magi Society believes that changes in the alignments of the planets result in changes in the direction of the financial markets. AstroFibonacci is designed to help you better time markets by giving you the software you need to analyze planetary alignments.

But please judge for yourself - read our articles on our websites and make your own decision whether you think we are right.

DETAILS ABOUT ASTROFIBONACCI CAPABILITIES, PRICING AND HOW TO ORDER

The rest of this email contains a ton of information about the capabilities of AstroFibonacci, as well as an ORDER FORM to buy our software.

The base price for AstroFibonacci is \$675

This automatically includes the four main asteroids, plus Sedna and six other new planets (Orcus, Peleus, Varuna, Ixion, UB313 - now called Eris - and Quaoar) and the program is completely Helio-balanced, meaning that everything it does for geocentric astrology it can also do in Heliocentric astrology.

You even get stock charting capabilities and free stock and futures data, and access to over 10 thousand first trade dates.

We also offer five optional upgrades for AstroFibonacci at additional cost as detailed later in this email.

We give a \$110 discount to those of you who are Magi Society members and already own the Heliocentric upgrade for any of our software programs. (This is because the Magi Society policy is that whenever you buy any upgrade from us, you automatically get the equivalent upgrade when you purchase any other software program from us. AstroFibonacci automatically comes with the Heliocentric upgrade. Details of the discount are also provided later in this email.)

You may purchase AstroFibonacci online, or by faxing the Order Form below. We accept major credit cards.

You may also mail us the Order Form with either your credit card information, or a check.

If you wish to speak to a live person, you may also call us and give us credit card information on the phone.

HOW TO SET UP A TELEPHONE APPOINTMENT WITH US

We understand that some of you will want to speak with us and ask some questions. Or you may prefer to place a credit card order on the phone instead of online.

To set up a telephone appointment to speak with us, please email us at:

magiastrology@aol.com

and we will arrange for you to speak to one of our representatives. We have a worldwide network so please tell us which country you live in, and let us know briefly why you would like to speak to us - such as to answer a detailed question or double check on AstroFibonacci's capabilities in a particular area, or give us credit card info. (We prefer to not post our phone numbers on our website because when we

did so, we got zillions of phone calls from people who were simply looking for free astrological advice. They would ask questions like "My husband is having an affair - will he stop?" or "What should I do with my investments now?")

SYSTEM REQUIREMENTS FOR ASTROFIBONACCI PROGRAMS

AstroFibonacci is designed for Windows and is fully compatible with Windows 2000, XP and Vista but it will also run on MACs that are equipped with Virtual PC. AstroFibonacci requires 128 megabytes of RAM and 75 megabytes of free hard drive space.

You may view some screenshots of AstroFibonacci by going to our website at magiastrology.com and StockMarketCompass.com and clicking on the Financial Astrology Software links under our logos. Anyone who purchases AstroFibonacci will automatically become a member of our StockMarketCompass.com website that includes access to our database of about 10 thousand First Trade dates for US stocks. We also hold regular conference calls where we teach Financial Astrology and answer questions from AstroFibonacci users.

THE CAPABILITIES OF THE BASIC ASTROFIBONACCI

Our clients have come to expect the best from the Magi Society and AstroFibonacci has not disappointed them. Even the basic version of AstroFibonacci has all the astrological capabilities you need for the best of Financial Astrology, such as Heliocentric astrology, Sedna, Chiron, Ceres, Juno, Vesta, Pallas, planetary alignment filtering, etc.

But in addition, AstroFibonacci gives you:

>> A: GRAPHING ABILITY

>STOCK AND FUTURES DATA

The AstroFibonacci program includes historical data for all the major stock indices, such as the S&P 500, DJIA, NYSE composite, NDX and COMP, FTSE 100, and Hang Seng Index.

You also get data for 40 major futures contracts including the Yen versus US dollar, gold, crude oil, pork bellies, etc.

In addition, we give you data for every S&P 500 stock and every US traded ETF.

Those who purchase AstroFibonacci are given passwords to download files containing such data and we update the data on a regular basis.

> FIBONACCI:

AstroFibonacci also allows you to draw moving averages, support and resistance levels and Fibonacci retracement lines.

AstroFibonacci has the ability to let you highlight astrological events right on the chart. For example, you can draw "pointers" on a stock chart and see what happened to a stock every time Saturn was square to Pluto.

The Basic version of AstroFibonacci has the graphing capabilities you need to chart all of the above data. This is enough for some of our purchasers. But if you are a professional investor, and you want the most advanced graphing capabilities, we suggest you consider the purchase of our Super Fibonacci Upgrade, which has the very best graphing features you can buy, as detailed later in this email.

>>B: PLANETARY SYNCHRONIZATION WHEEL

Most astrology programs focus on aspects between two planets but the Magi Society believes that aspects of three or more planets are more powerful than aspects formed by just two planets.

In Magi Astrology, an aspect comprised of three or more planets is referred to as a Planetary Synchronization. A Planetary Synchronization occurs when three or more planets all make aspects to each other.

Planetary Synchronization is a concept developed by the Magi Society and explained in our first and third books. We believe that Planetary Synchronization is important in Financial Astrology and AstroFibonacci is the only software program that calculates it, and displays it. AstroFibonacci gives you a separate additional wheel so you can easily view synchronizations, and you can see each synchronization separately, one set of synchronization at a time. You can even see transiting synchronizations one set at a time.

>>C: ASTROLOGICAL TIMING CAPABILITY UTILIZES BOTH GEOCENTRIC AND HELIOCENTRIC ASTROLOGY, CHIRON AND FOUR MAJOR ASTEROIDS

The basic AstroFibonacci program includes geocentric and Heliocentric longitudes, the declinations and latitudes, Chiron, Ceres, Juno, Pallas and Vesta from 1750 to 2050.

AstroFibonacci lets you do everything in Heliocentric astrology that you can do in geocentric astrology. AstroFibonacci even provides you with a duo-CAC display showing transits for geocentric and Heliocentric astrology at the same time.

>>D. TIME TO EXACT FEATURE FOR PRECISION TIMING

Most Financial Astrologers believe that the financial markets change directions at the exact time when two planets form certain alignments. To help you take advantage of such changes, AstroFibonacci has a Time to Exact capability that allows you to determine ahead of time when any major alignment of planets will be exact - not just the day or hour but pretty much the exact minute. You can also use the AstroFibonacci program to check back historically and find the exact times when any major alignment of planets did occur so you can see if there was indeed any changes in the direction of the financial markets at the time of those exact alignments.

>>E: HISTORICAL BACKTESTING CAPACITY

AstroFibonacci has extensive historical backtesting capabilities and these abilities are far better than those that are available from any other astrology-based program.

You can use AstroFibonacci to create a file (that can be dumped into an Excel spreadsheet) that tells you how gold futures (or any other futures) performed depending on various astrological factors you select - for examples:

--- How did gold futures perform for each three-day period prior to every Venus/Pluto trine compared to the first three days afterwards? (You can select the number of days before and after.)

--- How did oil futures perform for each ten-day period prior to each Saturn/Jupiter Square compared to the five days afterwards?

Such data is very valuable - but a graph is even more valuable so we made sure AstroFibonacci can give you all this data in a graphic format by drawing AstroGraphs.

>>F: CREATE ASTROGRAPHS

An AstroGraph is a graph of a stock or commodity, but it has vertical lines to indicate the time when certain astrological events occurred.

AstroFibonacci draws AstroGraphs.

It is the only program in the world that can draw AstroGraphs.

AstroFibonacci has the extraordinarily useful capacity to let you highlight astrological events right on the chart, for example, you can tell AstroFibonacci to draw "pointers" on a stock chart and see what happened to a stock every time Saturn was square to Pluto, or even when a stock had any major transit like Cinderella Transits.

By combining the AstroFibonacci graphing capability along with its Historical Backtesting Capacity, a user is finally able to perform in depth research into whether or not there is any relationship between astrological factors and the stock market, commodities, currencies and various futures markets. Among other capabilities, AstroFibonacci allows you to:

- a) Generate historical performance data based on astrological alignments or transits that you select.
- b) And then you can tell AstroFibonacci to graph for examples, gold, oil, a stock, etc. and draw pointer lines to indicate whenever any of these events occurred so you can see it right on the graph.

>>G: HISTORICAL RESEARCH OF MULTIPLE PLANET ALIGNMENTS

Other software programs can perform a little historical backtesting based on the alignment of just TWO PLANETS but AstroFibonacci allows you to conduct this research based on the alignments of three planets, for example:

---How did the S & P 500 perform for each five days prior to the peak of a GRAND TRINE of any three planets compared to the first three days after the peak of the Grand Trine?

---How did the S & P 500 perform for each 4 days prior to the peak of a T-Square of any three planets where one of the three planets is Saturn, compared to the first four days after the peak of the T-Square?

>>H: MAGI ZODIAC

This is AstroFibonacci's most exciting feature because it opens up an entirely new astrological world to every astrologer.

Astrology has always worked - but sometimes it appears as if it may not be working because we are missing some of the pieces of the astrological puzzle. But now, Magi Zodiacs give you some of the crucial parts of the astrological puzzle that were missing before. Our Magi Zodiac Upgrade allows you to divide the Zodiac into 5, 7, 8, 9, 10 and 13 equal parts instead of just the normal 12 equal parts. All of these "Magi Zodiacs" are important for defined segments of life - for example, Zodiac7 (the Zodiac divided into seven equal parts) is essential for understanding historically significant events including historic tops and bottoms in the stock markets, and life changing events in the world and in your life.

>>>UPGRADES FOR ASTROFIBONACCI

We offer five upgrades for AstroFibonacci. If you purchase all five upgrades at one time, you are entitled to a discount of \$150 discount from the total price of all the upgrades. Here are some specifics:

UPGRADE ONE: **TRADITIONAL HARMONICS UPGRADE for \$110**

Many financial astrologers use harmonic charts, such as the fifth or tenth harmonics. This upgrade gives you that ability but with a major improvement - it does so with a full 360- degree wheel and that makes all the difference in the world for clarity.

Naturally, this upgrade works for the Heliocentric chart as well as geocentric. You can select any Harmonic from 1 to 99. (Because of this enormous flexibility, the Time To Exact feature had to be limited to giving data only for the first harmonic.)

UPGRADE TWO: **FIND SYMMETRICAL PATTERNS UPGRADE for \$240**

This is a day trading tool.

Many financial astrologers believe that the peak of when Symmetrical Patterns are formed by certain planets will correspond to highs or lows in the financial markets.

With this upgrade, you can easily see each Symmetrical Pattern formed by the planets. The upgrade finds and draws Symmetrical Patterns made by three or four planets for you, and displays them individually. This upgrade also tells you the Time to Exact for each Symmetrical Pattern; these times are sortable. You can create a list box of the Time To Exact of symmetrical patterns sorted by time and see when such patterns occur sequentially.

If you also have the Harmonics Upgrade, you will be able to see the Symmetrical Patterns formed by the harmonic you select to use, but the Time to Exact will provide data for only the first harmonic.

UPGRADE THREE: **EXTRA ASTEROIDS for \$190**

The basic version of AstroFibonacci already includes the four main asteroids, Ceres, Juno, Vesta and Pallas. With this Extra Asteroids upgrade, you can include eleven more of Modern Astrology's favorite asteroids - Amor, Diana, Eros, Hidalgo, Icarus, Lilith, Pandora, Psyche, Saphho, Toro, and Urania - into every chart and calculation, or you can choose to add any combination of these Extra Asteroids.

The Time To Exact Feature (a Magi Society trademark feature) works on all Extra AstroBodies and Asteroids in MagiAstroSoft.

UPGRADE FOUR: SUPER FIBONACCI CHARTING WITH CHANNELS TRENDLINES FEATURE for \$180

AstroFibonacci has far better Fibonacci charting capabilities than any other program. In addition to being able to chart classic Fibonacci levels, AstroFibonacci is the only program that can draw Magi Fibonacci levels and extensions. Precision is always crucial and this AstroFibonacci upgrade gives you the exact value of all Fibonacci retracement and extension levels, up to 2 decimal places. And this upgrade also has Multiple Fibonacci capacity, allowing you to draw three sets of Fibonacci levels on the same graph, merge and sort the data so you have all the Fibo levels in logical order to help you to trade more successfully.

When you order this Super Fibonacci upgrade, you will also get our Channels plus Trendlines feature that gives you the ability to draw precision trendline projections.

ABOUT PRECISION TRENDLINE PROJECTIONS

For the five weeks after October 10, 2008, the stock market gyrated seemingly aimlessly up and down. Most technicians told us it was because the market was making a bottom and needed to retest the October 10 lows. But the real main underlying theme of the market was actually centered around the 5456 support level in the NYSE Composite Index. This support level is the super long-term bull market trendline that began all the way back in 1990, and rose 0.82 points per day in October 2008. The professional program traders were keying off that trendline - tens of billions of shares were traded along that trendline.

When stocks hit such important long-term support levels, it is really a trader's dream. By combining Precision Trendlines and planetary alignments, the Magi Society made 15% during those five weeks in its own online trading account.

The average hedge fund lost 25% during that same period of time. AstroFibonacci is the only program we know of that is available to the public at a reasonable price that allows you to draw such trendlines with precision. This AstroFibonacci upgrade can draw precision trendlines over not just years, but decades. Sometimes, that is what you need to be able to calculate crucial support and resistance levels.

UPGRADE FIVE: MAGI PROGRESSIONS for \$130

This upgrade is for the serious Financial Astrologer. The upgrade gives you the capability of calculating secondary and lunar progressions and includes the Magi Society's trademark Time To Exact Conversion

so you easily know when a secondary progressed transit or alignment peaks in real time. The purpose of this upgrade is to use Magi Astrology principles to select the best stocks to buy or short based on Magi progressions to a company's date of incorporation.

HOW TO PURCHASE ASTROFIBONACCI

If you wish to purchase AstroFibonacci, please do so simply by paying us online, or by faxing or sending us your order form below. Or you may give us your credit card information over the phone.

The Magi Society offers free technical support for the downloading and installing of all AstroFibonacci versions.

If you would like to pay us online, you may do so by going to our website at www.loveoracle.com and scrolling to the bottom of the homepage and then clicking on the PayPal Button, then follow the instructions. If you pay us that way, we will receive a record of your payment within 24 hours but please email us and let us know you paid and what you paid for and we will expedite your order. We would then be able to email you instructions on how to download the software from one of our sites. You may also request a CD by paying an additional small shipping and handling charge of \$16 if you live in the US and \$25 if you live outside of the US. A backup CD is not necessary since any buyer may save the downloaded files and use them for any reinstallation.

*****DISCOUNTS FOR OUR EXISTING MEMBERS AND OWNERS OF EARLIER VERSIONS OF FINANCIAL ASTROLOGY SOFTWARE*****

If you are already a member of the Magi Society and own our Heliocentric Upgrade for the membership software you may deduct \$110 from the sales price of AstroFibonacci.

If you already own a previous version of our financial research software, you may upgrade to AstroFibonacci for \$230.

Or if you already own Version 7.07 of our financial astrology software program, you may upgrade to AstroFibonacci for \$170, which is just the price of the upgrade for Sedna and six other new planets. You would also still be given the Magi Progressions upgrade because that upgrade was included in 7.07. The Magi Society appreciates your support and we try to be loyal and generous to our clients.
